Projects

○ **FlashCard Generator**

Flashcard app helps user to note down important information in form of flashcard and view it when needed.

This app is build up on famous JavaScript library React. Also some more libraries were used such as formik.js for creating and validation of form, Tailwind CSS is used for styling. Click Here

○ **Get YouTube Subscribers**

This is a backend server which has three API's of GET method which response with subscribers data as per request.

This project helped to enhance my knowledge on express.js and mongodb. Also I have come to know how to connect frontend to backend and sever to database. Click Here

○ **Blogging App**

This app mainly for person who writes blogs about famous destinations in India.

This is fullstack application build on top of ReactJS with backend server on Node.js and database on MongoDB. Click Here

○ **E-Commerce Website**

This is a dummy e-commerce website for buying various products listed in store.

The app is build using ReactJS and Redux. The products listed in the site are from fake api site. Click Here
